# WEATHER SYNOPSIS BY REGION

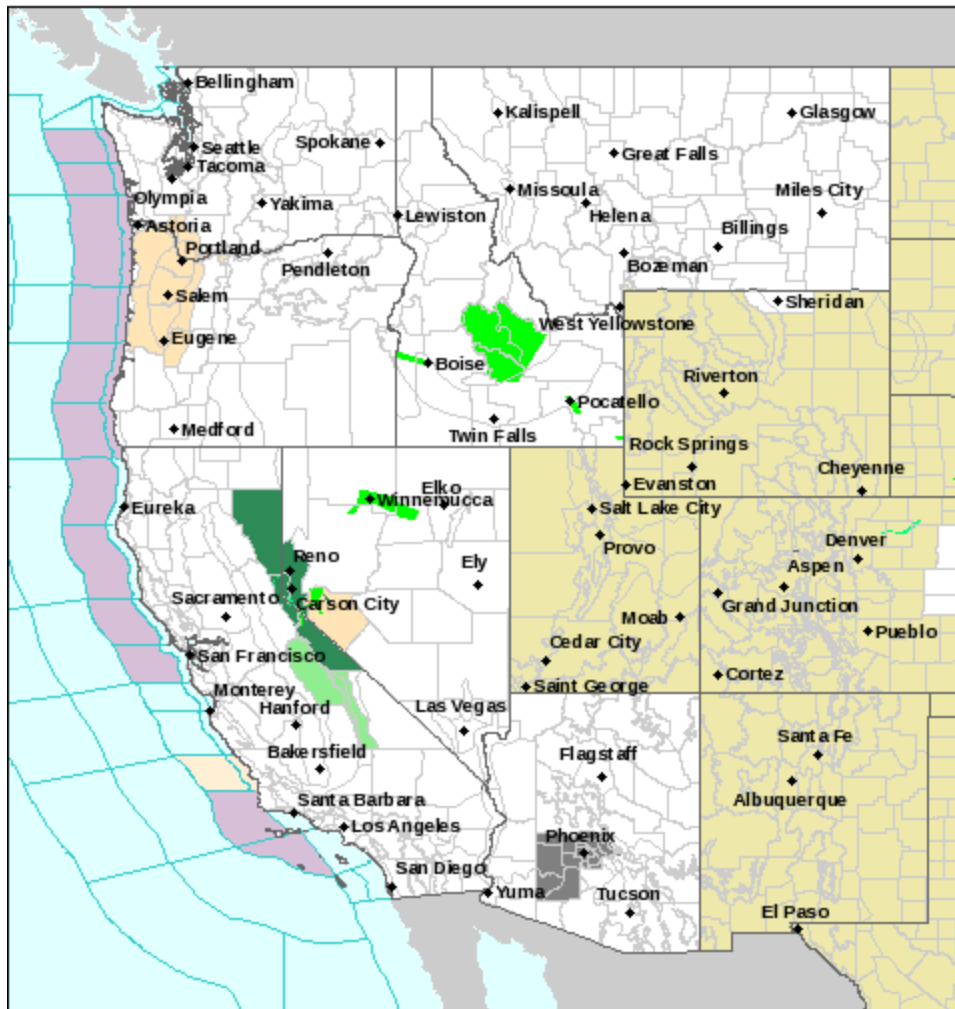

## **NORTHERN CALIFORNIA**

Building high pressure will promote dry weather and increasingly warm temperatures across the region through early next week. A chance of showers or thunderstorms will exist across the interior mountains next week.

## **SOUTHERN CALIFORNIA**

High pressure aloft will persist over southwestern California through Tuesday. Generally weak offshore flow will persist across inland areas allowing for higher than normal temperatures through Sunday. Marginal cooling will begin early next week as onshore flow increases. By mid week, an upper level trough of low pressure will move into the area with additional cooling through the end of the week. In addition, night through morning low clouds and fog will return to many coastal areas by early next week.
